FLATKART

Privacy Policy How Flatkart collects, uses, protects, and manages personal information

Document control

Details Policy version Version 1.0 Effective date 1 October 2026 Applies to Orders placed through

Flatkart's online

shopping platform Policy owner Customer Experience & Operations

Purpose. This policy explains the customer-facing rules, process steps,

responsibilities, and support route for the subject shown above.

Important corpus note. Sample policy corpus for RAG testing. Business-specific

details and legal terms require review before publication.

1. Scope and privacy principles

This policy describes how Flatkart handles information when a customer browses the platform, creates an account, places an order, contacts support, or uses related services. 1.1 Information covered Information may identify a person directly or be linked to an account, device, order, or support case. Flatkart aims to collect information relevant to providing the requested service and to explain material uses in clear language. ■ Account details such as name, email address, phone number, and login preferences. ■ Order details such as items, delivery address, order status, invoice, and return history. ■ Support communications and attachments voluntarily supplied for issue resolution. ■ Technical events such as device type, browser, session identifiers, and security logs. 1.2 Operating principles Access should be limited to authorised personnel and systems with a legitimate operational need. Information should not be collected merely because it is technically available. Operational note: This sample policy does not claim that any particular certification or legal registration has been obtained.

2. Information Flatkart collects

2.1 Information supplied by customers Customers provide information when registering, checking out, saving an address, requesting a return, submitting a review, or asking for support. ■ Contact and delivery information needed to fulfil an order. ■ Payment status and transaction references returned by a payment provider; Flatkart should not request a customer's full card number or CVV through support. ■ Preferences and messages that the customer chooses to submit. 2.2 Information generated during use The platform may record basic operational events to maintain sessions, detect suspicious activity, troubleshoot failures, and understand service performance. Where analytics are used, access and retention should be proportionate to the stated purpose. 2.3 Information from service partners Delivery partners may return shipment scans and delivery outcomes; payment providers may return transaction status; and customer-support tools may store ticket metadata needed to manage a case.

3. Why information is used

3.1 Service delivery Flatkart uses relevant information to authenticate accounts, process orders, coordinate delivery, issue eligible refunds, provide support, and maintain order history. 3.2 Safety and platform integrity Limited records may be used to investigate suspected fraud, prevent account misuse, resolve payment disputes, and protect platform availability. ■ Verify order and account details before discussing sensitive order information. ■ Investigate inconsistent payment or delivery events using available records. ■ Maintain audit trails for changes to orders, returns, and refunds. 3.3 Service improvement Aggregated operational statistics may be used to identify delays, repeated error patterns, or confusing customer journeys. Reports should avoid exposing individual customer details when those details are not necessary.

4. Sharing, access, and service providers

4.1 Limited sharing Information may be shared with a service provider only to support a defined task, such as payment processing, shipment delivery, customer support, hosting, or security monitoring. 4.2 Internal access Access should be role-based. Support staff may need order and contact details; finance staff may need transaction and refund records; administrators may need technical logs. Access should be logged where feasible. ■ Do not export customer data for personal use. ■ Do not disclose another customer's address or order details. ■ Escalate suspected unauthorised access through the designated security process. 4.3 No sale claim This sample policy states that Flatkart does not sell personal information as a standalone data product. Any future advertising or data-sharing practice must be reviewed and disclosed accurately before launch. Recipient Typical information Purpose Delivery partner Name, address, phone, parcel reference Deliver and update shipment Payment provider Transaction amount, token/reference, status Authorise or reconcile payment Support provider Ticket details and relevant order context Resolve customer request

5. Security, retention, and customer choices

5.1 Security safeguards Flatkart should use access controls, secure transport, monitoring, backups, and staff procedures appropriate to the information handled. No system can be described as risk-free; suspected incidents should be investigated promptly. 5.2 Retention Records should be kept only as long as needed for order servicing, accounting, dispute handling, security, and applicable recordkeeping obligations. A deletion request may be limited by records that must be retained for legitimate operational or legal reasons. 5.3 Customer requests Customers may contact support to correct contact details, ask about information associated with an account, or raise a privacy concern. Flatkart may verify identity before acting to protect the account. ■ Use the registered email address where possible. ■ Describe the requested correction or concern without sending passwords or OTPs. ■ Support may request reasonable order details to locate the relevant record.

6. Privacy request workflow and responsibilities

6.1 Escalation Requests involving suspected account compromise, unexpected disclosure, or a data-security incident should be escalated to the designated security or privacy owner rather than handled as an ordinary order-status question. 6.2 Staff responsibilities Staff should use approved tools, verify identity before disclosure, share only the minimum relevant information, and record material actions in the support case. Step What happens Customer outcome

1. Submit

Email support with the request and account identifier Request is logged

2. Verify

Support checks that the requester controls the account Unauthorised disclosure is reduced

3. Review

Relevant team checks the record and retention needs Request is assessed

4. Respond

Support explains the action taken or the reason for limits Customer receives an update

7. Privacy operations — illustrative chart and FAQ

The chart below is illustrative training data used to demonstrate how a privacy team might categorise incoming requests. It is not a report of actual Flatkart customer activity. 7.1 Frequently asked questions Customers should use support@flatkart.example for privacy questions. Support hours are Monday to Saturday, 9:00 AM–6:00 PM IST, excluding published holidays. 7.2 Quick answers Flatkart uses order data to fulfil and support purchases; limits access by role; shares necessary details with service partners; and reviews privacy requests after identity verification. Requests may be limited where records must be retained for operational or legal reasons. Illustrative privacy request mix Correction Access Deletion Security 0 9 18 27 36 Illustrative request count category in this illustration; these figures must not be represented as actual business statistics.

Quick reference and customer support

Use the policy sections above to identify the applicable rule and next action. When a case does not fit a listed example, the support team reviews the order record and the facts provided by the customer. Topic Quick rule Effective date 1 October 2026 Policy version Version 1.0 Support email support@flatkart.example Support hours Monday to Saturday, 9:00 AM–6:00 PM IST, excluding published holidays When contacting support, include the order ID, registered email or phone number, product name, relevant dates, and a short description of the issue. Do not send passwords, full card numbers, CVV codes, or one-time passwords.

Policy interpretation

This document is part of the Flatkart sample policy corpus. Where an order-specific message gives a more specific operational instruction, retain that message and contact support if the two appear inconsistent. No customer should be asked to share payment authentication secrets.

Personal-data handling overview

Stage	Purpose
Collect	Receive information needed for an interaction
Use	Support orders, accounts, and service
Store	Protect information for an appropriate period
Review/Delete	Apply retention and deletion procedures
