FLATKART

Refund Policy Refund eligibility, initiation, payment method, and status tracking

Document control

Details Policy version Version 1.0 Effective date 1 October 2026 Applies to Orders placed through

Flatkart's online

shopping platform Policy owner Customer Experience & Operations

Purpose. This policy explains the customer-facing rules, process steps,

responsibilities, and support route for the subject shown above.

Important corpus note. Sample policy corpus for RAG testing. Business-specific

details and legal terms require review before publication.

1. Refund scope and approval

This policy explains when Flatkart may initiate a refund and how customers can follow its status. 1.1 Common refund triggers A refund may be considered after an eligible cancellation, an approved return, a confirmed non-fulfilment, a verified duplicate charge, or another case authorised under the applicable policy. 1.2 Approval is a separate step A request, complaint, or return pickup does not by itself mean a refund has been approved. The order record should show the decision, amount, reason, and initiation status. 1.3 Partial refunds Where only part of an order is affected, the refund calculation should identify the affected item and any applicable shipping or discount adjustment. The customer should receive a clear explanation of the calculation.

2. Refund calculation and amount

2.1 Basis of calculation The amount is based on the eligible amount actually paid for the affected item or order, less any clearly disclosed and permitted adjustments. Support should rely on the order and payment records rather than estimate from the current product price. 2.2 Discounts and bundles For a discounted bundle or order-level promotion, the refund should follow the original pricing allocation and promotion terms shown at checkout. A refund should not silently create an unexplained negative balance. 2.3 Shipping and fees Whether shipping charges are refundable depends on the reason for the refund and the order terms. The decision record should specify the treatment instead of applying a blanket assumption to every case.

3. Refund timing and payment route

3.1 Processing target After approval and initiation, Flatkart's target is 5–7 business days after the refund is approved and initiated; bank or payment-provider posting may take longer. This is an operational estimate, not a guarantee of the exact posting date. 3.2 Original payment method Where supported, refunds are routed to the original payment method. Payment providers and banks control final posting; wallet or bank statements may update at a different time from

Flatkart's internal status. 3.3 No premature promise Support should distinguish between 'approved', 'initiated', and

'credited'. A refund marked initiated is not proof that the receiving bank has posted the funds.

4. Refund status and tracking

4.1 Status meanings Approved means the request passed Flatkart's review. Initiated means the refund instruction was sent to the payment provider. Credited means the provider or customer record confirms the funds were posted. 4.2 Reference numbers If a payment provider supplies a refund reference, support may share it with the customer through an appropriate channel. Customers should use the reference with their bank or provider if the expected period has passed. 4.3 Missing or delayed refund Check the order status, refund initiation date, payment method, and provider reference before raising an escalation. Do not ask customers to reveal passwords, OTPs, CVV codes, or full card numbers.

5. Refund exceptions and duplicate payments

5.1 Duplicate debit If a customer sees two debits for one order, support should compare the payment references and settlement statuses. One entry may be a temporary authorisation rather than a completed charge; the provider's records determine its state. 5.2 Failed payment If checkout failed but money appears debited, support should request the order or transaction reference and check the payment provider's result. The customer should not place repeated orders solely to test whether the first payment succeeded. 5.3 Escalation Cases with mismatched amounts, missing provider references, or a refund beyond the stated target should be routed to the payments team with the case history attached.

6. Refund workflow and example table

6.1 Customer checklist Keep the order ID, refund confirmation, payment reference, and relevant bank statement entry. Redact unrelated transactions before sending a statement. 6.2 Support checklist Confirm the amount, route, initiation date, provider reference, and status source. Explain whether the next action belongs to Flatkart, the payment provider, or the customer's bank. Status Meaning Next action Requested Customer has submitted a refund-related case Check eligibility and order evidence Approved Flatkart accepted the request Record amount and reason Initiated Refund instruction sent to provider Share reference if available Credited Funds are confirmed as posted Close case after customer update

7. Refunds — illustrative timing chart and FAQ

The chart illustrates hypothetical processing durations for training; it does not report measured Flatkart refund performance. 7.1 Quick answers The target is 5–7 business days after approval and initiation, with additional time possible for bank or provider posting. Check the status and reference before escalating. 7.2 Contact For an overdue or mismatched refund, contact support@flatkart.example with the order ID and payment reference. Never send a password, OTP, CVV, or full card number. Illustrative refund processing durations Review Initiation Provider 0 1 2 3 4 5 6 Illustrative business days policy target of 5–7 business days begins after approval and initiation; provider posting can take longer.

Quick reference and customer support

Use the policy sections above to identify the applicable rule and next action. When a case does not fit a listed example, the support team reviews the order record and the facts provided by the customer. Topic Quick rule Effective date 1 October 2026 Policy version Version 1.0 Support email support@flatkart.example Support hours Monday to Saturday, 9:00 AM–6:00 PM IST, excluding published holidays When contacting support, include the order ID, registered email or phone number, product name, relevant dates, and a short description of the issue. Do not send passwords, full card numbers, CVV codes, or one-time passwords.

Policy interpretation

This document is part of the Flatkart sample policy corpus. Where an order-specific message gives a more specific operational instruction, retain that message and contact support if the two appear inconsistent. No customer should be asked to share payment authentication secrets.

Refund timeline reference

Stage	Expected handling
Request submitted	Confirmation of request
Review	Eligibility and order checks
Approved	Refund initiated
Payment provider	Additional processing time may apply
