FLATKART

Cancellation Policy When an order can be cancelled and what happens after the request

Document control

Details Policy version Version 1.0 Effective date 1 October 2026 Applies to Orders placed through

Flatkart's online

shopping platform Policy owner Customer Experience & Operations

Purpose. This policy explains the customer-facing rules, process steps,

responsibilities, and support route for the subject shown above.

Important corpus note. Sample policy corpus for RAG testing. Business-specific

details and legal terms require review before publication.

1. Cancellation eligibility

This policy explains how a customer may request cancellation and how the order's operational status affects the result. 1.1 Standard rule A customer may generally request cancellation before the order is marked Shipped. 1.2 Why status matters Before dispatch, the order may be stopped within the order system. After carrier handover, the parcel may no longer be cancellable through the ordinary flow and the customer may need to follow the return process. 1.3 Request is not confirmation Submitting a cancellation request does not mean it succeeded. The customer should check the updated order status or cancellation confirmation.

2. How to request cancellation

2.1 Self-service Open order history, select the relevant order or item, choose Cancel where available, select a reason, and submit the request. 2.2 Support request If the cancellation option is unavailable but the order is not marked Shipped, contact support quickly with the order ID. Support will check whether the fulfilment system can still stop it. 2.3 Partial cancellation Where an order contains multiple items, cancellation may be possible for one item while the rest continue. The revised order total and any refund should be communicated clearly.

3. Cancellation by order stage

3.1 Processing The order may be stopped if warehouse or fulfilment work has not progressed beyond the point where cancellation is possible. 3.2 Packed or ready for dispatch The request may require an operational check because a shipping label or pickup process may already have started. Support should not promise success until the order system confirms it. 3.3 Shipped Once marked Shipped, ordinary cancellation is generally unavailable. If the parcel is delivered, the customer may review return eligibility under the Return and Replacement Policy.

4. Payment and refund after cancellation

4.1 Unpaid order If payment was not completed, support should verify that no completed charge exists before describing the order as unpaid. 4.2 Paid order When an eligible paid order is successfully cancelled, the refund is reviewed and initiated under the Refund Policy. The cancellation confirmation and refund status are separate records. 4.3 Payment still pending If the payment provider has not returned a final status, the order may need reconciliation. Customers should avoid placing duplicate orders until they understand the first transaction's status.

5. Exceptions and failed cancellation

5.1 Already shipped If the cancellation request arrives after carrier handover, support should explain the current shipment status and any available return option. 5.2 Verification hold An order held for payment or security checks may not be cancellable through the usual button. Support should confirm the order state and route the request to the relevant team. 5.3 Customer notification The outcome should be communicated through the order page, email, or support case. If cancellation fails, explain the reason and the next available option.

6. Cancellation decision table

6.1 Avoid duplicate requests One clear request with the order ID is preferable to repeated submissions. If no status update appears, reply to the existing support case where possible. 6.2 Evidence Retain the cancellation confirmation and any refund reference. These records help support trace the order and payment state. Order state Typical result Next step Processing May be cancellable Submit request and await confirmation Packed Requires operational check Contact support if option is unavailable Shipped Ordinary cancellation unavailable Check return eligibility after delivery Cancelled Order stop confirmed Check refund status if already paid

7. Cancellation — illustrative stage chart and FAQ

The chart is a hypothetical example for knowledge-base testing, not a record of Flatkart orders. 7.1 Quick answers Cancellation is generally available before the order is marked Shipped. After shipment, use the return policy if the item is delivered and eligible. 7.2 Refund reminder A successful cancellation does not mean the money is already credited. Refund processing follows the Refund Policy and provider posting timelines. Illustrative cancellation requests by stage Processing Packed Shipped 0 9 18 27 36 Illustrative request count guaranteed cancellation success rate; the current order status controls the decision.

Quick reference and customer support

Use the policy sections above to identify the applicable rule and next action. When a case does not fit a listed example, the support team reviews the order record and the facts provided by the customer. Topic Quick rule Effective date 1 October 2026 Policy version Version 1.0 Support email support@flatkart.example Support hours Monday to Saturday, 9:00 AM–6:00 PM IST, excluding published holidays When contacting support, include the order ID, registered email or phone number, product name, relevant dates, and a short description of the issue. Do not send passwords, full card numbers, CVV codes, or one-time passwords.

Policy interpretation

This document is part of the Flatkart sample policy corpus. Where an order-specific message gives a more specific operational instruction, retain that message and contact support if the two appear inconsistent. No customer should be asked to share payment authentication secrets.

Illustrative cancellation guidance

Order status	Typical cancellation outcome
Placed	Usually eligible
Confirmed	Request may be reviewed
Packed	May be restricted
Shipped	Generally not cancellable
